Cube in-a-Box – V3.series – Assembly Instructions

1

Unpack all the parts, check quantities with the packing list. If there is a problem with the count, call our customer service at 1-888-880-2823 (Pacific Time) or email at infosales@cubeinabox.com

2

Slide panel 1T * (24"W) in between end-post A (37"H), and a 2-way post B (57"H). Then slide half-panel 2 (36"W) in between post B and linear-post C (57"H).
*TIP 1: letter T is for panels with a pre-installed alu cap.

3

Slide other half-panel 2 (36"W) in between post C and second 2-way post B. Slide panel 3 (36"W) in between 2-way post B and second linear-post C.

4

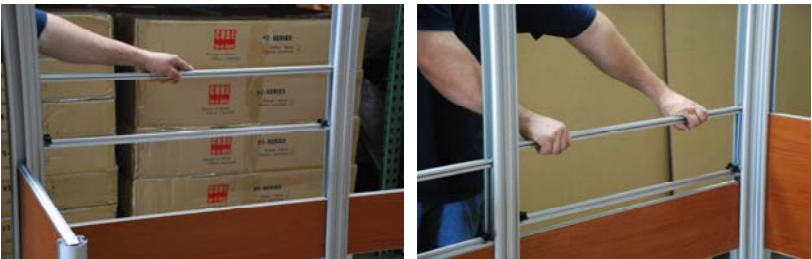

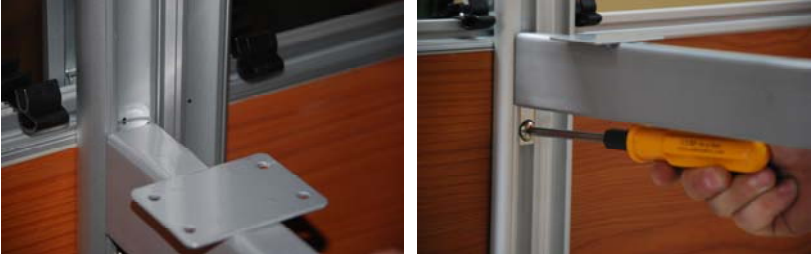

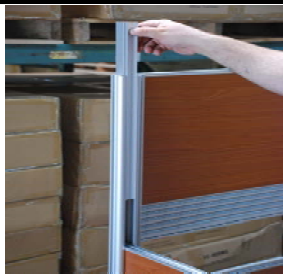

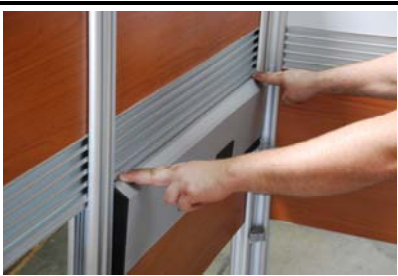

Slide panel 3T (36"W) in between linear-post C and 2-way post D (37"H). Slide other panel 1T (24"W) in between 2-way post D and other end-post A.

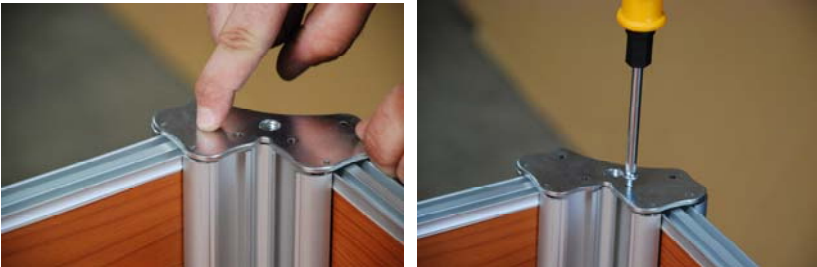

5

Use a rubber hammer and make sure all panels are pushed all the way down.

| | | |
|----|--|---|
| 6 |  | Slide raceway-panels 4 on top of the half-panels 2. |
| 7 |  | Slide rail-panels 5 ** on top of the raceway-panels. **TIP 2: Rail-panels must be installed with hooks facing up so paper and pencil trays can hold on them. |
| 8 |  | Slide panels 3T (36"W) on top of the rail-panels 5. |
| 9 |  | Slide whiteboard-panel 6T (marker board) on top of the last rail-panel 5. |
| 10 |  | Assemble the 2 wire-guides and slide/adjust them into posts where you will need them, preferably under work top level. |
| 11 |  | Check and assemble all brackets and cantilevers. Use big chromed-screws here. |
| 12 |  | Adjust the brackets and cantilevers to the mark level (dot) on each post. Cantilevers go on linear posts C, brackets go on all other posts. |

| | | |
|----|--|--|
| 13 |   | <p>Repeat for all brackets and cantilevers.</p> <p>You just need to tighten the big chromed- screw to make it hold.</p> |
| 14 |   | <p>Display brackets on all corners and on all end posts.</p> |
| 15 |   | <p>Insert each fillers to hide the empty space at end of posts B and C, as per pictures.</p> |
| 16 |   | <p>Display the raceway-cap by adjusting at the bottom into the black plastic molded piece on each side, and then by pressing on top of each side into the frame.</p> |
| 17 |   | <p>Use a leveler to adjust all the work-tops and brackets.</p> <p>You may use an electric drill from underneath to screw the tops. Use the black wood-screws here.</p> |
| 18 |   | <p>Check and assemble the two shelf-supports with the big chromed-screws.</p> <p>Slide each support into the posts where you want the shelf to be displayed.</p> |
| 19 |   | <p>Adjust both shelf-supports at the height of your choice.</p> |

| | | |
|----|--|---|
| 20 |  | Display the shelf on top of the shelf-supports, then push vertically on each of the black plastic brackets until it fits in. |
| 21 |  | Push the shelf against the panel. Display the book-holders as per the holes. Use a leveler to adjust the shelf-supports height. |
| 22 |  | Place all the metal-caps on top of each post, then use a screw driver to tighten them with the flat self tapping metal-screws. |
| 23 |  | Place magnet plastic-caps on top of each post. Place the grommet-cap on the work-top hole. |
| 24 |  | YOU ARE DONE!! |
